

Andreev Sergey Nikitovich

Junior Full-Stack Web Developer

E-mail: asergey91@gmail.com

Portfolio: HighFiveMe.eu

Phone: +32490436981

Address: Kapellestraat 77, Tervuren, Belgium

Education:

-CareerFoundry online intensive bootcamp	2015-2016	Online
-Various front-end developer certifications	2011-2014	Online
-Bachelor in Industrial Sciences	2009-2011(unfinished)	Groep T(KU Leuven)
-International Baccalaureate Diploma	2007-2009	British School of Brussels

Skills:

-Client-Side:

Javascript, HTML5, CSS3, Angularjs, JQuery

-Server-side:

Ruby, PHP, C++, Ruby on Rails, SQL

-Other:

MVC pattern, Git Source Control, Photoshop, Windows, Linux

Experience:

Github repositories and links to most of the projects/applications listed here can be found on my portfolio web-site: HighFiveMe.eu, as well as other examples of my work.

-Professional:

Steam tournament app (in progress)

Technologies: Steam API, Ruby on Rails, Angularjs, JQuery, CSS3, HTML5

Responsibilities: I am currently in the process of making a competitor to Challonge.com. It's an online application for generating and managing tournament brackets. However unlike

[Challonge.com](#) it has full integration with the steam web API, making it easy for users to set up and manage Steam game tournaments.

Challenges: Writing an easy to use API for generating, traversing and managing tournament brackets.

Arina-travel.com

Technologies: Wordpress, PHP, JQuery, HTML, CSS

Responsibilities: Maintain a very poorly managed Wordpress site.

Challenges: Working with a wordpress site

Trade Bot for Path Of Exile

Technologies: Ruby on Rails, JQuery, HTTP, Nokogiri

Responsibilities: Had to write a trade bot from scratch for a client, it had to scrape a website and simulate POST requests as a user based on data that was scraped.

Challenges: Reverse engineering POST requests, Using caching to improve performance and avoid the server from timing out.

-Educational:

Complete Web-Commerce Solution

Technologies: Ruby on Rails, JQuery

Responsibilities: Made a complete Ecommerce solution with Ruby on Rails and a bunch of popular web APIs as part of the CareerFoundry web-developer course.

Challenges: Implementing automated tests after most of the code is written.

Reddit Clone

Technologies: Ruby on Rails, Angularjs

Description: A simple clone of Reddit I made to get acquainted with client side MVC principles in Angularjs.

Tier List App for Rising Thunder

Technologies: LAMP stack

Description: A simple app I made to learn the LAMP stack and help me crowdsource tier list data for the game Rising Thunder

Languages:

-English: Fluent

-Russian: Fluent

-Dutch: Beginner
